910. COMMUNITY RELATIONS

- .1 The Board of School Directors feels it imperative that communication be maintained in both directions between the public schools of the district and such local institutions, organizations and groups as industry, business, labor, charity, and other special interests which make up the structure of the community.

- .2 The Board shall interpret the educational program to the people and invite discussions and suggestions on important educational policies, and shall attempt, at all times, to represent the entire community rather than any single group or section. To this end the Board establishes the following school-community relations goals:
 - .21 To develop intelligent citizen understanding of the school system in all aspects of its operation.

 - .22 To determine how the citizenry feels about the school system and what it wishes the school system to accomplish.

 - .23 To develop citizen understanding of the need for adequate financial support for a sound educational program.

 - .24 To help citizens assume a more direct responsibility for the quality of education the school system provides.

 - .25 To earn the good will, respect, and confidence of the citizenry in the personnel and services of the school system.

 - .26 To bring about citizen understanding of the need for the improvement and what must be done to facilitate essential change.

 - .27 To involve citizens in the work of the Board and the solving of its educational problems.

.28 To promote a genuine spirit of cooperation between the Board and community in sharing leadership for the improvement of the community.
