

**Buildings, Grounds, and Athletics Committee
of the Bloomsburg Area School District Board of Directors**

5 March 2024, 7 p.m.

Bloomsburg Area Secondary Complex Enhanced Learning Center

Meeting Summary

In Attendance

- Jonathan J. Cleaver, Superintendent
- John Khan, School Board Member
- Mike Kogut, Athletic Coordinator/Assistant to the Middle School Principal
- David Marsiglio, Business Administrator
- Eric Miller, School Board Member
- Bob Nenstiel, Head of Buildings and Grounds
- Eve Ralston, School Board Member

Tennis Court Presentation: Livic Civil

- Reviewed scope of the project
- \$40,000 line item for refurbished lights included
- Scope of project never included complete removal and installation of new courts
- Plan for crack repair and material explained
- Plan includes new nets and net post
- Would be a new overlaid surface
- The grant requested was for 75% of the estimated cost for all proposed projects
- Questions asked for clarification of removal versus repair (it has always been a repair estimate from the engineer), complete removal was never part of the original scope of the project for the tennis courts

Solar Panel Project Presentation: GreenWorks Development

- Review of solar projects that have been completed for other districts
- Review of preliminary solar analysis for the district
- Options listed for district in relation to location of panels
- Discussion on the installation process for roof-mounted panels
- Charts reviewed for cost of project based on three options presented
- All options do offset 100% of the school district's electrical usage
- Possible tax credits discussed based on location of panels
- Possible options for selling unused electric
- Discussion on benefit for the five-year buyout, non-buyout, or direct purchase options
- Discussion on additional purchase of property and possible locations
- Best return is to have all panels in one location and ground mounted (discussion focused on Evans property)

- Estimated time for project completion (approx. 14 months) with majority of the first 6-8 months going through the development and approval process

Solar Panel Project Presentation: McClure Company

- Presentation rescheduled for next month

Other Items for the Good of the Order

- N/A
